

## Robot Talk

During different parts of the day, like transitions or outdoor play, talk like a robot. Say words with a long pause in between syllables. Then let children put them together and guess what you're saying. For example, before sitting down for snack, have children guess whose name you are saying. Once they get it, they can sit down.

### Prompt Children to Identify or Manipulate Various Units of Sound

**While cleaning up:** "Listen carefully to hear all of the parts of the word. Base (*1-2 second pause*) ball... Yes! Please put the baseball on the shelf."
