

How Can I Help?

Using made up stories or naturally occurring moments in the classroom encourage children to think about how the person is feeling and what they can do to help or care for them.

Prompt Children To Provide Care For Others

- ◆ “They are sad because they miss their Mom, what can we do that might help them feel better?”
- ◆ “Our puppet felt frustrated because their blocks kept falling over, what could we do to help them?”
- ◆ “In the story they fell! It hurt them, if you were in the story what could you do to help them?”
