Line Art

Use art materials and measurement words to create an art piece! Provide children with paper and materials to create lines (e.g., paint, crayons, markers). Have children draw a line. Encourage children to draw additional lines that are longer, shorter, tall, etc. to add to their artwork. As children draw, use questions and comments to focus on measurement words.

Use Measurement Words

“You just painted a short line. I wonder if your next line will be longer or shorter. Oh, you made a longer line!”

“We just painted 10 different lines. Can you find your smallest line?”
