# Object Sort!

Gather a collection of objects (e.g., nature items, recycled materials, blocks, different lengths of string, etc.). Challenge children to sort objects by length, height, weight, and size.

## For example:

- ◆ Short vs. long objects
- ◆ Short vs. tall objects
- ◆ Light vs. heavy objects
- ◆ Small vs. big objects

## Prompt Children to Compare Objects (Measure)

“Hold this pom pom and this rock. Which is heavier? Which is lighter? Yes, you're right! The pom pom is lighter.”

“There are blue pieces of yarn and yellow pieces of yarn. I wonder how we could sort these. You're right! The blue yarn is longer and the yellow is shorter. Let's sort by length.”
