

Music Math

Make music with children by using instruments, clapping your hands, stomping your feet, or even just drumming on an empty bin or table. As you are making music, point out the number of beats. For example, point out the number of times you clap in your song. Encourage children to count the beats with you.

Model One-To-One Correspondence

“I hear (Child) creating music by stomping their foot. They did 2 quick stomps and one fast one, so 3 beats altogether. Let’s all count them together this time... 1, 2, 3!”

“Let’s clap out 4 beats and count them as we go, ready?”
