

## Recycled Items Sensory Bin

Collect recycled items, such as cardboard, newspaper, empty containers, toilet paper rolls, bubble wrap, etc. and put them into a sensory bin for children to explore. Prompt children to freely explore the items or to look for certain items (e.g., “Can you find all of the toilet paper rolls?”).

**More Support:** Model and narrate children’s explorations as they dig through the recycled items.

### Narrate Curiosity and Exploration

“You are looking at the rips in the newspaper. I wonder how they got there.”
