

Build It

Prompt children to complete building challenges, like building a long bridge, a tall tower, or a home for animals of different shapes and sizes. Prompt them to think of a plan, gather resources, and try it out. Encourage them to use blocks, Legos, or even just boxes to complete the challenge. Offer ideas or assistance as needed.

Promote Autonomy

“You want to try the long block for the top of the bridge. Let’s test it out to see if it might work!”

“Hmm... I don’t know what we can use to make a tall tower. What do you think might work?”
