

## **Make A Maze**

Build a maze using different items around the classroom (e.g., boxes, furniture, chairs, towels, brooms, etc.). Encourage children to go through the maze, prompting them to try different paths to get from one side to another. As children complete the maze, ask them to help you change the maze by moving paths and creating dead ends. Modify your maze and its obstacles based on children's abilities.

### **Ask Open Ended Questions**

“How are we going to get through this maze?”

“Hmm... it looks like this way is blocked. How can we get around it?”
